EXPERIENCE

ZEVIAR | Frontend Developer | Remote | 2025 – 2026

- UI Development: Developed responsive user interfaces using HTML, CSS, and JavaScript.
- Authentication UI: Designed and implemented Sign In / Sign Up interfaces.
- Collaboration: Worked with team members to test, debug, and improve frontend components.
- Performance Improvement: Enhanced UI consistency and performance across multiple pages.
- Tech Stack: HTML5, CSS3, JavaScript

CodeSentinel | Software Development Intern | Remote | Aug 2025 – Sep 2025

- System Development: Built a Parking Lot simulation system using Java and OOP principles.
- Testing: Wrote unit tests using JUnit to ensure code reliability.
- Component Design: Developed a reusable product card with responsive layout and interactivity.
- Achievement: Earned [Certificate](#) of Completion for internship program.
- Tech Stack: Java, JUnit, Git, OOP

CodeAlpha | Web Development Intern | Remote | Jul 2025 – Aug 2025

- UI Animation: Implemented animations using GSAP and AOS libraries.
- Web Projects: Built portfolio website and product landing page.
- Tech Stack: HTML5, CSS3, JavaScript, GSAP, AOS

EDUCATION

Eötvös Loránd University | BSc Computer Science 2024 – 2027 (Present)

Relevant Coursework: Web Programming, Data Structures, Object-Oriented Programming, Algorithms
Software Engineering, Operating Systems, Concurrent Programming, Python

PROJECTS

Hangman Game | [View Project](#)

Developed a JavaScript-based Hangman game using HTML and CSS. Focused on loops, arrays, DOM manipulation, and interactive UI design.

To-Do List App | [View Project](#)

Built an advanced task management app with drag-and-drop, animations, and efficient state handling using JavaScript.

Car Brand Gallery | [View Project](#)

Created a responsive gallery with filtering, animations, and lightbox navigation. Focused on UX and dynamic UI behavior.

Interactive Product Card UI | [View Project](#)

Developed a responsive product card with animations, hover effects, and dark mode support.

Analog + Digital Clock | [View Project](#)

Built a real-time clock using HTML5 Canvas and JavaScript, combining analog and digital displays with smooth animations.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, Python, Java, C#, C
Software/Tools: Git & GitHub, Responsive Web Design
Responsive Design, Flexbox, CSS Grid
Frameworks/Libraries: GSAP, AOS

LANGUAGES

English: Fluent (B2 – C1)
Azerbaijani: Native
Turkish: B1
Russian: A1
